American Heart Association.

ACLS Prep: ECG & ACLS Prep: Pharmacology

2025 CPR & ECC GUIDELINES

Specifically designed to address key knowledge gaps in Electrocardiogram (ECG) and Pharmacology, the American Heart Association's **ACLS Prep: ECG and ACLS Prep: Pharmacology** courses are focused on specific ECG recognition skills and drug treatment knowledge. Recognizing that without strong competency in either ECG recognition or drug treatment knowledge related to the ACLS algorithms, achievement of the ACLS course for healthcare professionals is more difficult.

These self-directed eLearning courses are ***now updated to reflect the new science from the 2025 Guidelines for CPR and ECC***, serve as an ACLS precourse preparation option for students needing to improve ECG recognition skills and drug treatment knowledge.

CONTINUING EDUCATION CREDITS AVAILABLE

WHO SHOULD TAKE THE COURSE?

ACLS students who need to improve ECG recognition and drug treatment skills and knowledge, or healthcare professionals wanting to gain knowledge in ECG recognition and pharmacology. This includes non-critical/emergency nurses, emergency medical services personnel, respiratory therapists, physician assistants, non-critical/emergency physicians, and dentists.

LEARNING OBJECTIVES

ACLS Prep: ECG

- Explain heart anatomy and basic electrophysiology
- Explain normal ECG measurements
- Recognize and understand the basic arrhythmias

ACLS Prep: Pharmacology

- List basic ACLS drugs and their usage
- Identify ACLS medication doses and routes of administration during cardiovascular emergencies
- Apply basic pharmacology into the ACLS algorithms
