TELEPRIMARY CARE eLEARNING COURSE

About this course package:
This course is designed to equip primary care professionals with the telehealth knowledge and skills needed to meet the growing demand for high-quality virtual care. The curriculum addresses both the clinical and operational aspects of telehealth, including virtual physical assessment techniques, telehealth workflows, and key considerations for supporting provider productivity while maintaining a high standard of patient care.

Who should take the course?
Primary care professionals who are transitioning to or expanding virtual care services and want to ensure their approach is efficient, compliant, and aligned with high standards of care.

- Physicians
- Physician Associates
- Nurse Practitioners
- Nurses

Does this course offer CE credit?
Physicians, Nurses, Nurse Practitioners, and Physician Associates may earn up to 6.0 continuing education credits. For full CME/CE accreditation information on this course, please visit hrt.mobi/teleprimary.
