Sudden cardiac arrest can happen anywhere, at any time. The best chance of surviving is to get CPR right away. Sadly, most of the time it doesn’t happen that way. The American Heart Association wants students to learn CPR before they graduate from high school, putting more qualified lifesavers in our communities every year.

FACTS ABOUT CPR Training

Over 350,000 people have a cardiac arrest outside of a hospital every year.

CPR By the Numbers

A student can be trained in CPR in just one class period.

I can help!

• 1 wheeled classroom carry bag
• 10 Mini Anne® Plus inflatable manikins
• 10 kneel mats
• 10 individual carry bags
• 1 hand pump for manikin inflation
• 5 practice-while-watching training DVDs (NOTE: DVD has not been updated to reflect 2015 Guidelines; however, guidance for providing necessary science updates to students is provided in the CPR in Schools Lesson Plan)
• 1 Facilitator Guide (UPDATED images and text)
• 1 Facilitator Binder that contains the Lesson Plan, pre- and post-test, and additional supplementary material
• 10 AED training simulators
• 2 mesh collection and storage bags
• 10 replacement airways
• 10 replacement face mask
• 50 manikin wipes

CPR Training Kit
