

# AHA ACLS App

The AHA ACLS app is the American Heart Association's (AHA) officially endorsed digital health solution to help healthcare professionals run codes and deliver advanced cardiovascular life support (ACLS) to actual patients at the point of care. Developed by Harvard-trained physicians in collaboration with the Association and Massachusetts General Hospital, the AHA ACLS app contains clinical protocols, content, and resources.

The app was developed by Harvard-trained physicians, in collaboration with the Association and Massachusetts General Hospital, to help fellow physicians, physician assistants, nurse practitioners, and EMTs deliver the highest level of ACLS.

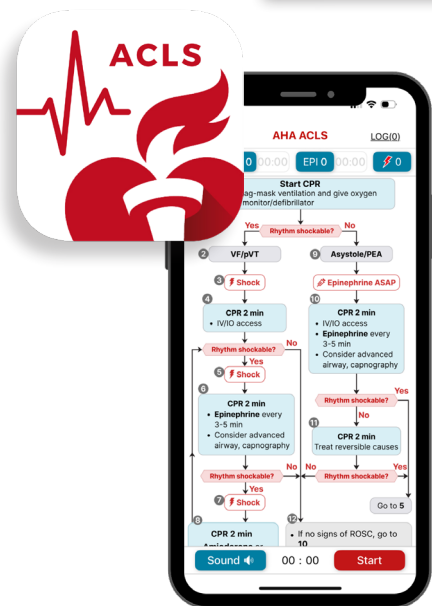

## FEATURES

- Intuitive design to rapidly access 4 ACLS algorithms (i.e. cardiac arrest, tachycardia with pulse, bradycardia with pulse, and post cardiac arrest care)
- Includes all ACLS content including drug therapy and dosing, reversible causes, etc.
- Easy-to-read timers and ability to log rounds of CPR, epinephrine, and defibrillations
- Button within cardiac arrest algorithm that allows for rapid transition to post cardiac arrest care pathway once patient achieves ROSC
- Downloadable events log for quick review and documentation
- Intubation logging to track advanced airway placement and timing
- "Notes" section in the Cardiac Arrest Code Runner to record important non-PHI info
- All content rigorously vetted by the Association science team and practicing Harvard-affiliated physicians
- Regularly updated with the most up-to-date ACLS content

## PRICE

AHA ACLS App offers an auto-renewing annual subscription at \$2.99/year with a 3-day free trial.

You will have unlimited access to all content while you maintain an active subscription.
