

Resuscitation Quality Improvement® (RQI®) 2025

Incorporating American Heart Association®'s 2020 Guidelines and introducing RQI True Adaptive™ Learning powered by Area9 Lyceum

RQI Portfolio:

- RQI Provider
- RQI ALS
- RQI PALS
- RQI for NRP®*
- RQI Responder

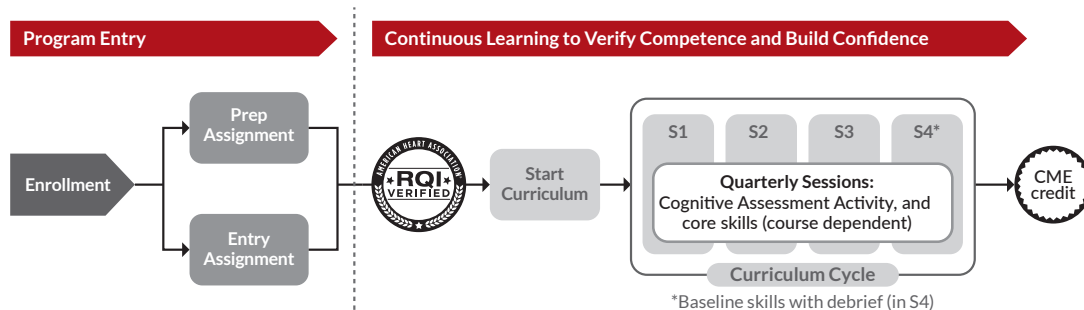

Transforming Resuscitation for Life Verified Competence – Resuscitation Quality Improvement (RQI) 2025

RQI verified CPR competence is the higher standard of care, demonstrated to improve clinical care delivery and to increase survival from sudden cardiac arrest.** The RQI portfolio of Provider, ALS, PALS, Responder and RQI for NRP curriculum delivers verified competence through quarterly cognitive and skills simulation sessions, and does so at a lower cost than traditional CPR programs.

- **Saves more lives** – achieves and verifies competence, increases confidence and improves clinical care delivery, resulting in improved patient outcomes
- **Low-dose, high-frequency quarterly learning** – improved cognitive retention and recall, critical elements of mastery learning
- **Analytics** – meaningful performance data and quality metrics at the organization and learner level
- **Learning platform** – delivered through RQI 1Stop® or the existing LMS
- **Get With The Guidelines®-Resuscitation** – included with RQI is participation in the American Heart Association's (AHA's) National Registry of Cardiopulmonary Resuscitation (NRCPR), representing resuscitation data from hospitals nationwide to create evidence-based guidelines for inpatient CPR.
- **RQI eCredential** – verifies the learner has demonstrated competence in high-quality resuscitation skills after each session

RQI Learner Journey

*RQI for NRP will be available June, 2021
**Panchal et al, *Resuscitation*, 2019

RQI 2025 Transforming Resuscitation for Life

The Utstein Formula for Survival is widely recognized as a method of predicting survival from sudden cardiac arrest. RQI supports each element of the Utstein Formula for Survival with the goal of increasing survival with high-quality, verified CPR competence.

UTSTEIN Formula for Survival

Medical Science

Grounded in and simultaneously updated with the American Heart Association's Guidelines and evidence-based science

X

Educational Efficiency

Mastery Learning

- Low-dose, High-frequency
- Contextual Learning
- Debriefing & Feedback

X

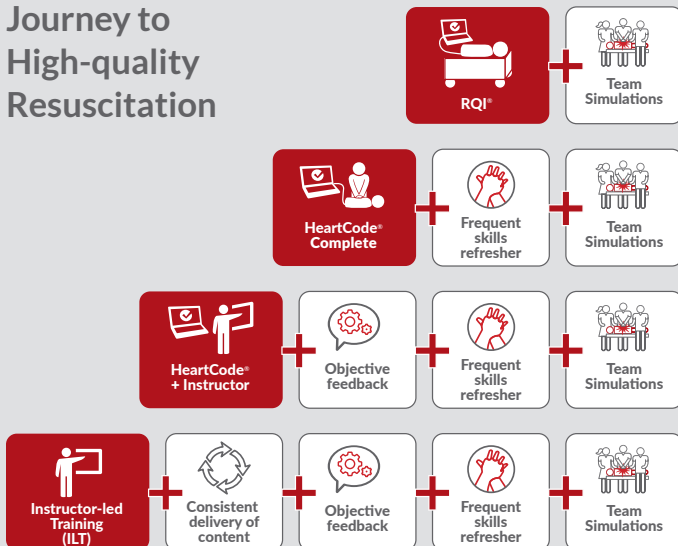

Local Implementation

- RQI Analytics
- GWTG®-R Registry
- Rapid Dispatch
- Account-Dedicated RQI Impact Manager

= SURVIVAL

Journey to High-quality Resuscitation

Quality

RQI is considered the gold standard of high-quality CPR education. The journey to high-quality CPR is one of continuous quality improvement. RQI's robust analytics provide insight to each learner's participation, performance and improvement.

The AHA's Get With The Guidelines®-Resuscitation (GWTG®-R) Essentials is included with the RQI program. With over one million records, GWTG-R is a clinical registry providing transparency with hospital quality and trends to improve patient outcomes.

Innovation

Powerful, Unique Education Technology – Personalized to Each Learner

True Adaptive™ Learning powered by Area9 Lyceum – The RQI Prep courses adjust in real-time to tailor and customize each learning experience to the individual student.

Responsive Design – Mobile and Tablet Support

Contextual Content, designed for systems of care and for non-clinical staff working in healthcare environments

All eLearning is Accessible – WCAG 2.1 AA compliant

Courses Available in Multiple Languages
