

infant CPR ANYTIME®

Prepare parents. *Saving a life is why.*

As a trusted healthcare provider, families look to you for guidance and education on issues that affect the health and well-being of their infant. The ability for bystanders to perform CPR or choking relief in a cardiac or respiratory emergency can mean the difference between life and death.

Infant CPR Anytime® kits teach the core skills of infant CPR and choking relief in about 20 minutes in the comfort of your own home. The kit is co-branded with the American Academy of Pediatrics and is an effective training tool for new parents, grandparents, babysitters, or anyone caring for an infant.

Course Content

- CPR with breaths and choking relief for infants
- Bilingual (English and Spanish) instructions, materials, and video to better serve more people
- A personal, inflatable Mini Baby® CPR manikin that clicks when you've pushed hard enough
