## **COVID-19 and Child and Infant CPR**

If a child or an infant's heart stops and you're worried that they may have COVID-19, you can still help.

If help is available, phone 9-1-1. Send someone to get an AED while you start CPR.

## Step 3

Provide CPR with compressions and breaths (if you're willing and able).

- Start child CPR
- Push on the middle of the chest 30 times at a depth of 2 inches with 1 or 2 hands.

Provide 30 compressions and then 2 breaths. Repeat cycles.

## Start infant CPR

Push on the middle of the chest 30 times at a depth of 11/2 inches with 2 fingers.

Provide 30 compressions and then 2 breaths.

Repeat cycles.

Use the AED as soon as it arrives. Continue CPR until EMS arrives.
