Location	Original	Change	When Change Was Made
<p>Illnesses and Injuries: Group A—Part 1 &gt; throughout the Allergic Reactions section</p>		<p>{ Changes have been made to reflect new guidance from the US Food and Drug Administration about the use of epinephrine autoinjectors: <i>Hold the leg firmly in place just before and during the injection. For EpiPen and EpiPen Jr injectors, hold the injector in place for 3 seconds. Some other injectors may be held in place for up to 10 seconds. Be familiar with the manufacturer’s instructions for the type of injector you are using.</i> }</p>	<p>Version 2 (accessible)</p>
